SANDHI TECHNOLOGIES
TECHNOLOGY IN ACTION

Sandhi Technologies

AI & DeepTech Solutions for Smart Manufacturing & Digital Transformation

Empowering Intelligent Rail Manufacturing through Artificial Intelligence, Computer Vision, Enterprise Software, and Industrial Automation.

Prepared for: Titagarh Rail Systems Ltd.

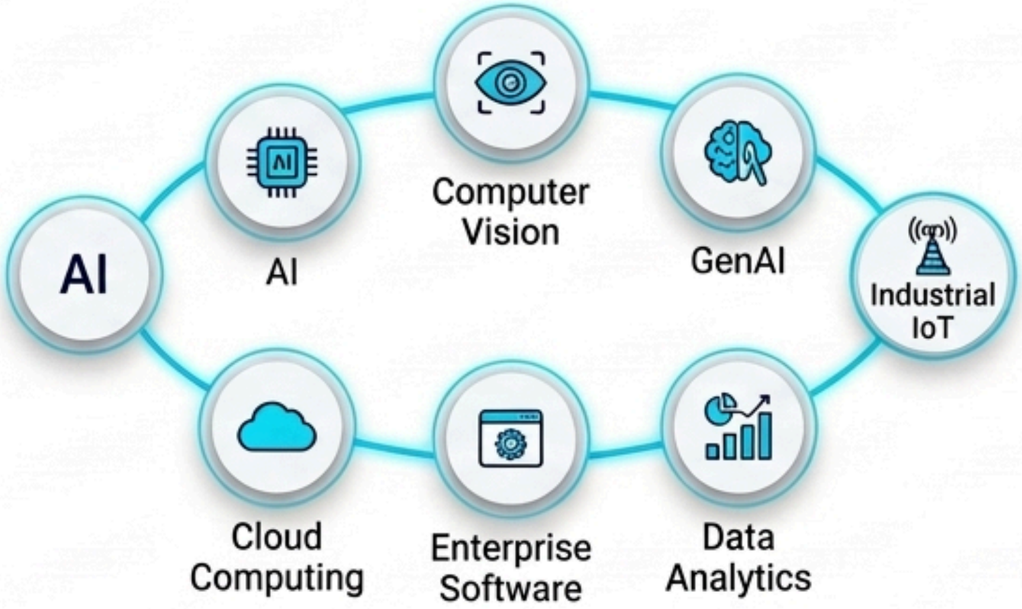

SANDHI TECHNOLOGIES
TECHNOLOGY IN ACTION

Why Sandhi Technologies

Engineering Intelligent Solutions for Industry

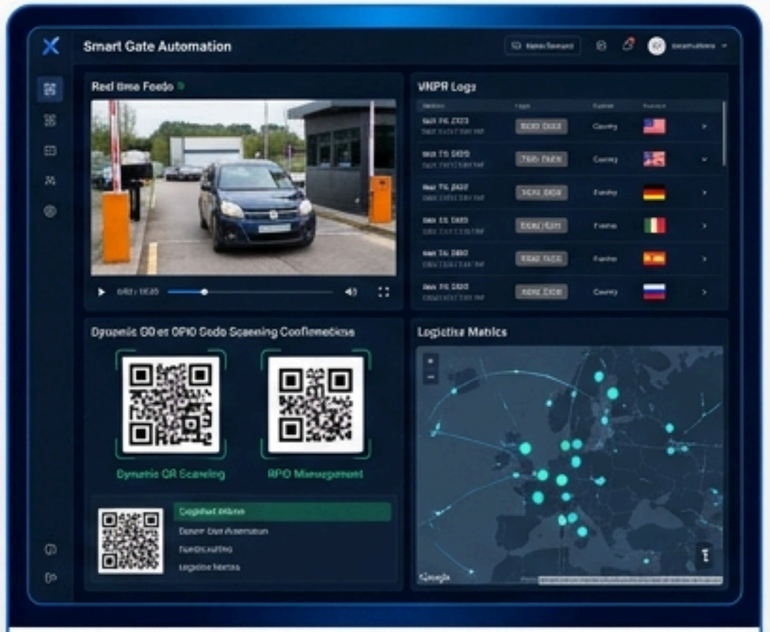

Building enterprise-grade AI and DeepTech solutions that transform industrial operations.

- Top IIT Institute Team
- AI Expertise
- Industrial Solutions
- Cloud Native
- Rapid Delivery
- Enterprise Ready

Proven AI Solutions Across Industries

Building intelligent platforms that solve real-world operational challenges.

Smart Gate Automation

Logistics

- ANPR
- QR
- RFID
- Visitor Management

Karamnetra.ai

AI Vision

- Object Detection
- Defect Detection
- AI Inspection
- Image Analytics
- Monitoring

1033 Call Efficiency Platform

Workflow AI

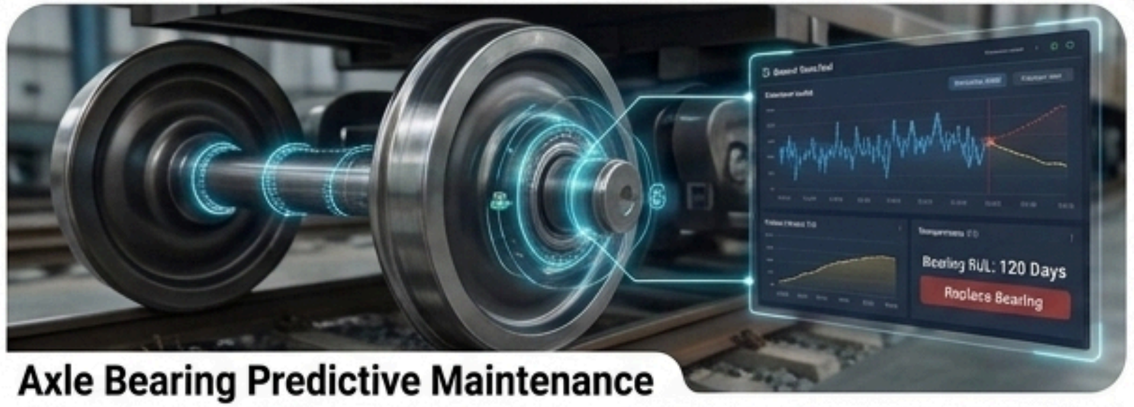

- KPI Dashboard
- Analytics
- Workflow
- Reporting

Three production-focused platforms demonstrating expertise in AI, Computer Vision, Automation, and Enterprise Software Development.

Premium Executive Presentation

AI Opportunities for Titagarh Rail Systems

High-impact AI solutions for intelligent railway manufacturing.

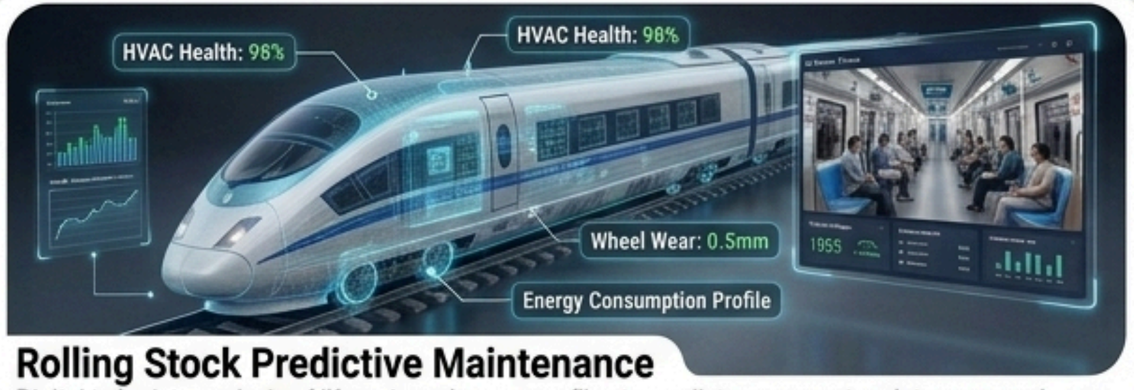

Axle Bearing Predictive Maintenance

AI-driven analysis of vibration and temperature data to predict bearing failure and prevent derailments.

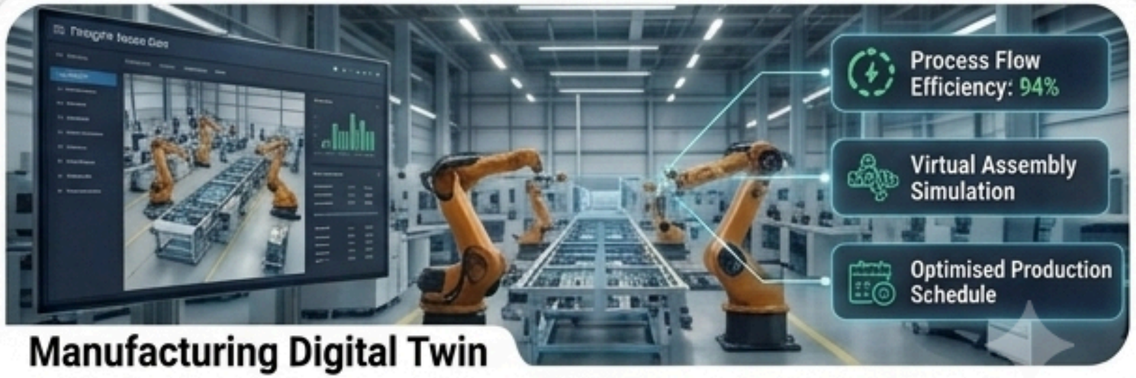

AI-Based Weld & Paint Defect System

Computer vision and deep learning for sub-millimeter inspection of weld integrity and paint surface finish quality.

Rolling Stock Predictive Maintenance

Digital twin data analysis of lifecycle and usage profiles to predict component maintenance and optimize service intervals for entire fleets.

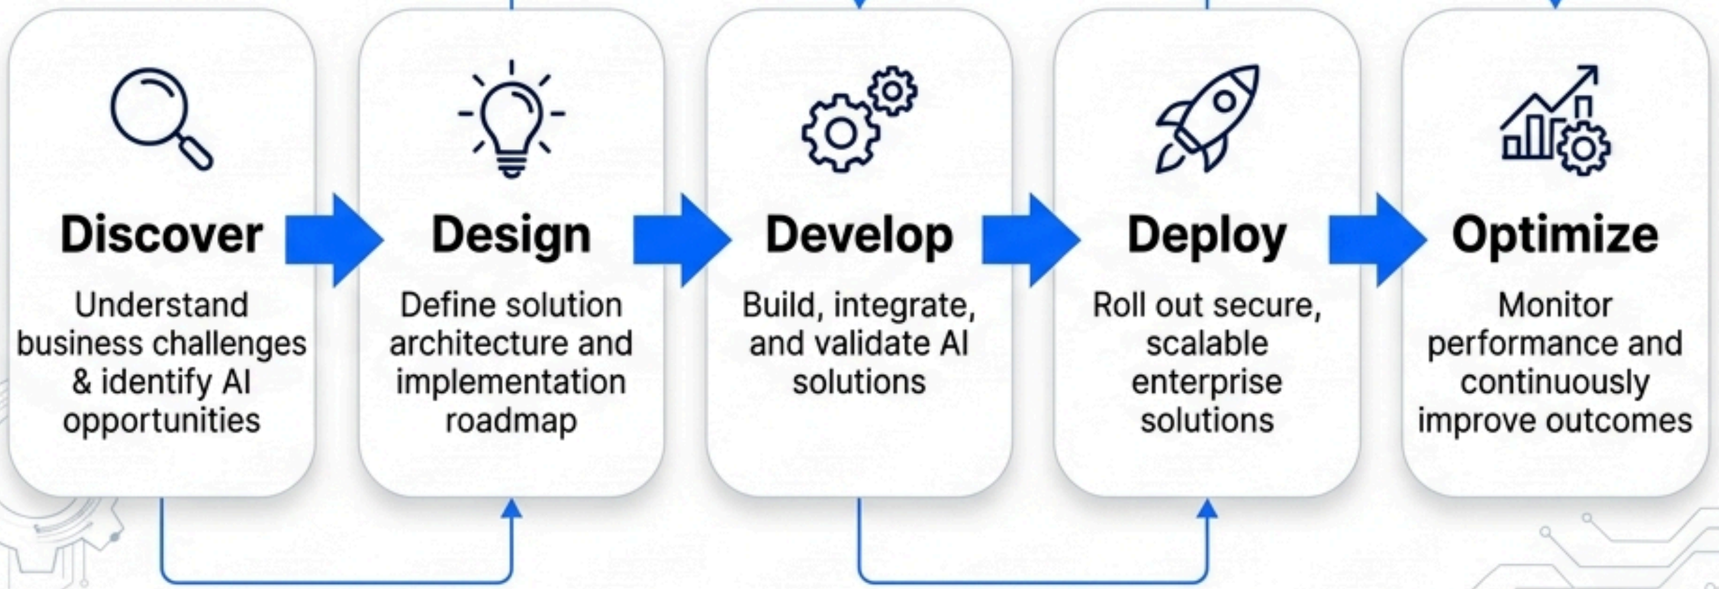

Manufacturing Digital Twin

Virtual mirror of production processes to optimize factory layout, workflow efficiency, and new-product introduction.

Building an AI-powered manufacturing ecosystem that improves quality, efficiency, and operational excellence.

From Idea to Enterprise Deployment

Our collaborative approach to delivering AI solutions.

Why Spartix Technologies?

- AI & DeepTech Expertise
- Enterprise-Grade Security
- End-to-End Product Engineering
- Scalable Cloud Architecture
- Agile Proof of Concept
- Long-Term Technology Partner

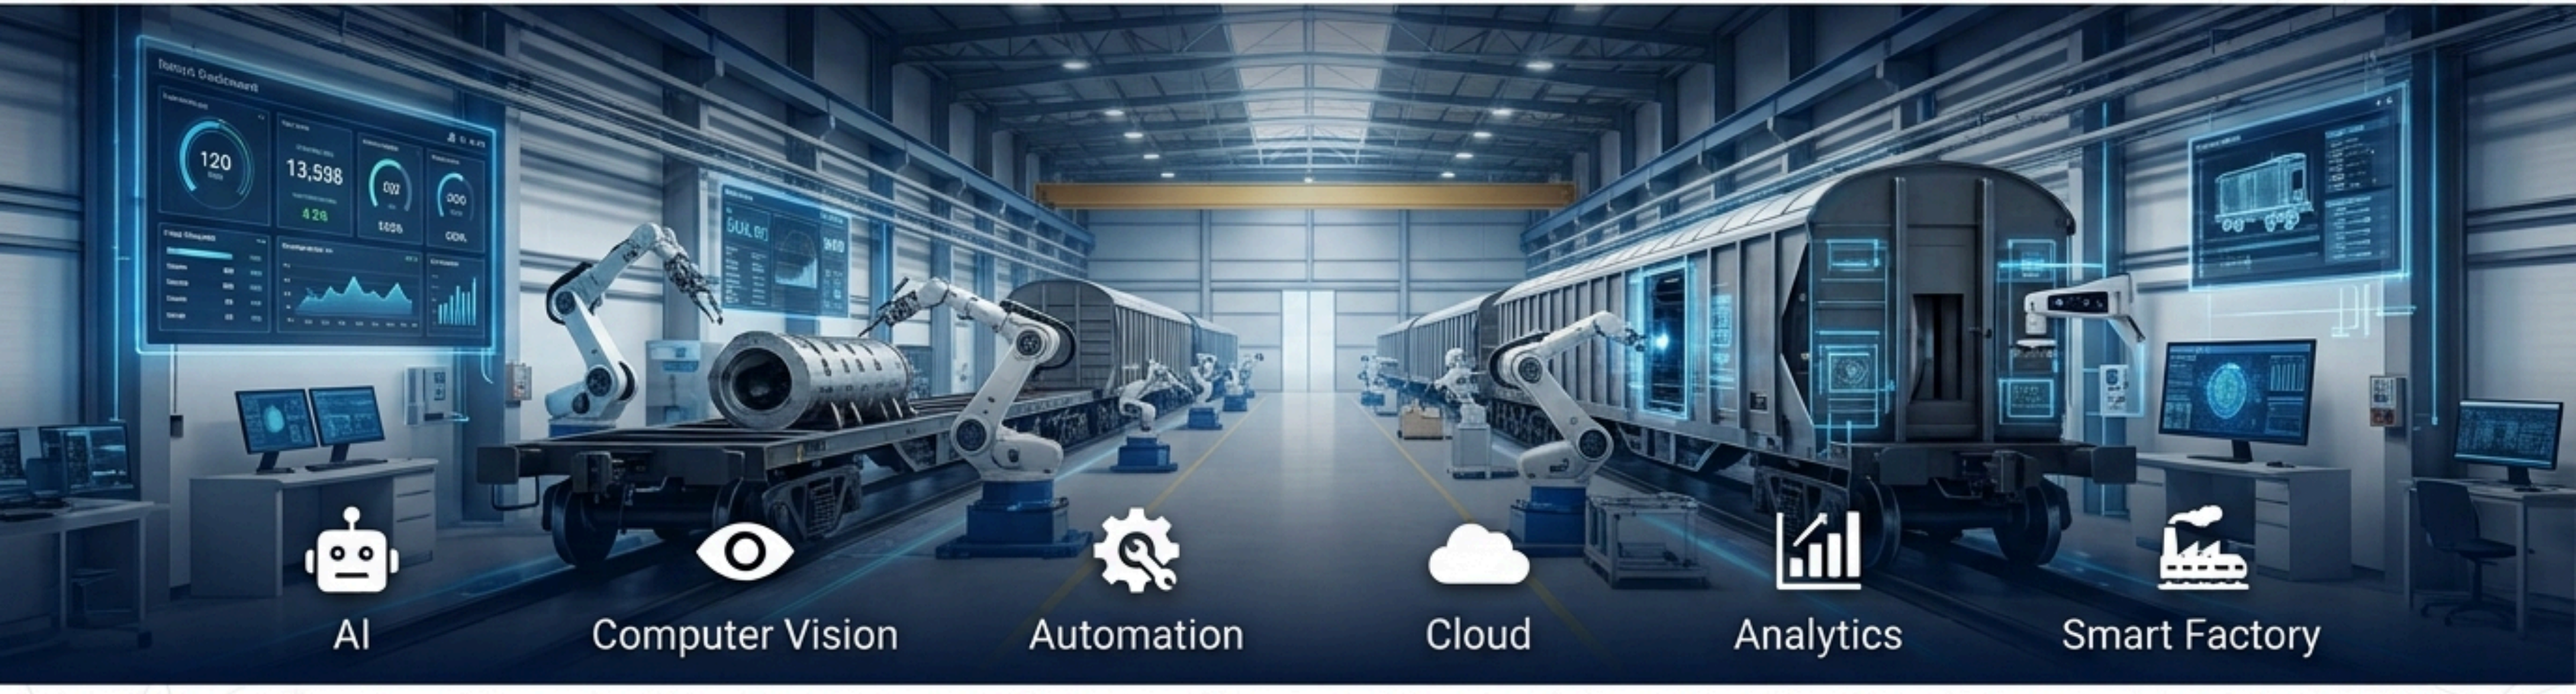

AI ◦ Computer Vision ◦ Enterprise Software ◦ Industrial Automation

Our goal is not just to deliver software—but to build long-term digital capabilities that create measurable business value.

Premium Executive Presentation

The Future of Intelligent Rail Manufacturing

Driving innovation through AI, DeepTech, and Enterprise Software.

Together, we can build intelligent, data-driven manufacturing systems that enhance quality, productivity, and operational excellence.
